## Summary

---

I am a web developer having expertise in frontend development and exposure to back-end development. I design and develop web applications using the latest technologies to deliver the product with quality code.

## Experience

---

### GKB Labs LLP

Software Developer

Aug 2023 - present

- Designed and implemented software solutions using [specific technologies/languages, e.g., JavaScript, SQL, Node.js].
- Collaborated with team members to gather requirements and translate them into technical specifications.
- Developed and maintained backend services and RESTful APIs.
- Improved application performance and scalability through optimization and refactoring.
- Executed unit, integration, and system testing to ensure software reliability.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of an Agile team.
- Utilized continuous integration/continuous deployment (CI/CD) pipelines for automated testing and deployment.
- Engaged in peer code reviews to maintain coding standards and shared best practices.
- Provided technical support and troubleshooting for existing applications and systems.

## Objective

---

Seeking a fulfilling career in the IT industry where I can leverage my technical aptitude and passion for innovation. Committed to contributing positively to team objectives while continuously expanding my skill set. Excited to embrace challenges and collaborate with driven professionals in a stimulating work environment.

## Languages

---
